

Ryan-Biggs Associates, P.C. is looking for a few good structural engineers!

As a consulting firm specializing in structural and facilities engineering, and industrial, parking structure, and bridge design, Ryan-Biggs Associates provides a broad range of professional services that includes planning, design, investigations and reports, peer reviews, and value engineering. In addition, we also offer a number of specialty services including masonry studies and restoration, historical preservation, and facade studies.

Positions are available for experienced structural design engineers for building and bridge projects in our Troy, NY office.

Bridge position:

Experienced structural engineer/manager sought for design of bridge projects. Bachelor's degree in engineering and 8 or more years of design experience required. Knowledge of NYSDOT standards required. Professional registration required. Duties include structural design, marketing, submittal review, construction observations and administration, field investigations, and technical writing.

Building position:

Experienced structural engineer sought for design of building projects. Commercial, medical, educational, and industrial building design experience required. Three or more years of design experience desired. Historic restoration interest and timber, concrete, and masonry design experience strongly desired. Bachelor's degree in engineering required. Graduate degree in engineering or historic preservation preferred. Professional registration or ability to become licensed within 2 years desired. Duties include structural design, submittal review, construction observations, field investigations, and technical writing. Please indicate office of interest if you have a preference.

Fax resumes to Ryan-Biggs Associates at 518-272-4467, Attn: Chris Leshner, or email to clesher@ryanbiggs.com.
